ABOUT ME

Geospatial Analyst | GIS Developer | Urban & Regional Planner

Geospatial professional with a B.Tech in Urban and Regional Planning and professional experience in GIS, spatial analysis, remote sensing, and geospatial data processing. Skilled in QGIS, ArcGIS Pro, Python, GeoPandas, Rasterio, PostgreSQL/PostGIS, Google Earth Engine, Web GIS, and geospatial automation, with practical exposure to Machine Learning, GeoAI, and Deep Learning for geospatial applications.

Projects I have worked on include land parcel mapping and digitization, urban planning and infrastructure analysis, soil erosion modelling using RUSLE, public service accessibility, flood mitigation planning, and landslide hazard and infrastructure risk assessment.

What sets me apart is my ability to combine urban planning knowledge with GIS, programming, remote sensing, and GeoAI to develop practical, automated, and data-driven solutions for real-world problems.

SKILLS

GIS Software

QGIS / ArcGIS / ArcGIS Pro / Spatial Data Processing / Cartography & Map Design / Remote Sensing / Google Earth Engine / Google Earth

Programming

Python (GeoPandas, Rasterio, Pandas, NumPy) / JavaScript (Leaflet, basic web mapping) / GIS Workflow Automation / SQL / R

Web GIS

GeoServer / Mapbox / Leaflet.js / WMS/WFS Services / Interactive Web Mapping / Spatial Data Publishing / HTML, CSS / Streamlit

Machine Learning & GeoAI

Exploratory Data Analysis (EDA) / Feature Engineering / Scikit-learn / Supervised Learning, Unsupervised Learning / Regression, Classification / Model Evaluation

Deep Learning & Computer Vision

ANN / CNN / Object Detection, YOLO / Image Classification / TensorFlow, Keras, Ultralytics

Spatial Databases

PostgreSQL / PostGIS / Spatial Querying / Spatial Indexing / Database Design & Management

Design & Drafting

Adobe Photoshop / SketchUp / AutoCAD / Adobe InDesign

EDUCATION AND TRAINING

Bachelor of Technology (B.Tech) – Urban and Regional Planning

Jawaharlal Nehru Architecture and Fine Arts University (JNAFAU) [2019 – 2023]

City: Hyderabad | Country: India | Level in EQF: EQF level 6

WORK EXPERIENCE

SpatialX Technologies – Hyderabad, India

Geospatial Data Analyst

[08/2025 – 02/2026]

- Led 2D feature extraction projects using satellite imagery and GIS technologies.
- Digitized buildings, utilities, transportation networks, and land-use features from remote sensing datasets.
- Managed and coordinated a team of 20 GIS analysts for large-scale geospatial production projects.
- Conducted spatial data validation, topology checks, and quality assurance procedures.
- Developed standardized GIS workflows to improve data consistency and project efficiency.
- Worked on the SWAMITVA project involving village-level land parcel mapping and land record digitization.
- Performed spatial analysis and data preparation for geospatial deliverables.
- Supported end-to-end GIS project execution from data acquisition to final output generation.

Freelance

GIS Subject Matter Expert

[06/2025 – 08/2025]

- Provided GIS technical guidance and mentoring for PhD researchers.
- Assisted in designing GIS-based research methodologies and workflows.
- Supported spatial data preparation, visualization, and geospatial analysis.
- Assisted in interpreting spatial results and preparing research outputs.
- Recommended GIS tools and methodologies for spatial problem-solving.

Global Information Technologies – Hyderabad, India

Junior GIS Engineer

[08/2023 – 10/2024]

- Georeferenced and integrated spatial datasets, approved layouts, and planning maps for urban development projects.
- Performed spatial data validation, quality assurance, and topology correction to ensure accuracy and consistency of GIS databases.
- Conducted land-use, zoning, and infrastructure analysis to support master planning and urban development initiatives.
- Generated thematic maps, spatial reports, and visualizations for planning authorities and project stakeholders.
- Supported the Master Plan Update for Rajamahendravaram Urban Development Authority (RUDA) through GIS-based analysis and planning data integration.
- Optimized solid waste collection route mapping across the Greater Hyderabad Municipal Corporation (GHMC) area using GIS and spatial analysis techniques.
- Collaborated with urban planners, engineers, survey teams, and government authorities to deliver geospatial solutions for planning and infrastructure projects.

Hyderabad Unified Metropolitan Transport Authority (HUMTA/HMDA) – Hyderabad, India

Traffic and Transportation Planning Intern

[04/2023 – 05/2023]

- Assisted in street redevelopment and non-motorized transport planning projects.
- Conducted field surveys, traffic data collection, and spatial analysis.

- Supported pedestrian infrastructure and mobility improvement studies.
- Prepared GIS maps, reports, and planning documentation.
- Coordinated with project teams and local authorities during planning activities.

The Rainwater Project – Hyderabad, India

Water Security Project Intern

[05/2022 – 08/2022]

- Assisted in data collection and hydrological analysis for groundwater management projects.
- Supported water resource mapping and watershed assessment activities.
- Contributed to GIS-based analysis for water security planning under AMRUT 2.0.
- Prepared project reports, maps, and presentations.
- Assisted in identifying potential water sources and resource management strategies.)

PROJECTS

Soil Erosion Modelling Using RUSLE | Python, NumPy, Raster Processing, Remote Sensing • Developed a Python-based RUSLE workflow to model annual soil loss and erosion susceptibility in Nilgiris, Tamil Nadu. • Integrated rainfall, soil, topography, vegetation, and land management datasets to derive R, K, LS, C, and P factors. • Performed raster-based analysis and NDVI assessment using DEM and Landsat-derived datasets. • Generated soil loss and erosion risk maps to identify erosion-prone areas and support sustainable land management planning.

Public Service Accessibility Analysis | Python, GeoPandas, Pandas, Shapely, QGIS, OSM • Developed a GIS and Python-based workflow to evaluate accessibility to hospitals, schools, and parks in Greater Chennai. • Performed network-constrained service coverage and zone-wise accessibility analysis. • Automated spatial processing using GeoPandas and Shapely. • Identified underserved areas to support data-driven urban planning decisions.

Green Infrastructure-Based Flood Mitigation Planning for Hyderabad • Conducted GIS-based flood vulnerability assessment and urban drainage analysis. • Evaluated the impact of urbanization on flood risk and stormwater management. • Identified suitable green infrastructure interventions for flood mitigation. • Developed planning recommendations to improve urban resilience and sustainability. • Utilized GIS tools for spatial analysis, mapping, and decision support.

Landslide Hazard Mapping & Infrastructure Risk Assessment | QGIS, DEM, OSM, Spatial Analysis • Performed GIS-based landslide susceptibility mapping for Rudrapur, Uttarakhand using terrain analysis and landslide inventory data. • Conducted slope, hillshade, and overlay analysis to identify high-risk zones. • Assessed road network exposure to landslide-prone areas and quantified vulnerable infrastructure segments. • Developed hazard and risk maps to support disaster mitigation and infrastructure planning.

CERTIFICATIONS

[Harita Hive (OPC) Pvt. Ltd.,]

Soil Erosion Modelling using RUSLE Completed a 5-day intensive training covering RUSLE methodology, erosion assessment workflows, factor derivation (R, K, LS, C, P), raster analysis, and soil loss modelling using QGIS.

Mode of learning: Project based

[Nonplan (Organisation of Students of Planning)]

Annual Convention of Nonplan Participated in the Annual Convention of Nonplan, engaging in discussions on urban planning, regional development, sustainable infrastructure, and emerging planning practices.

[Jawaharlal Nehru Architecture and Fine Arts University (JNAFAU)]

World Population Day Workshop Participated in the World Population Day Workshop focused on population dynamics, urbanization, sustainable development, and planning challenges.
